PROFILE

EPITA-trained engineer and Full Stack Developer. I design, build and ship web applications with React, Node.js and PostgreSQL. I built MonPoste on my own, a job board that collects 100,000 offers and tailors CVs with AI.

EXPERIENCE

Web Developer · Safran Landing Systems

Sep 2023 — present

Design and maintenance of two internal web applications. Started with a 5-month internship, now as a freelancer.

Node.js · JavaScript · PostgreSQL · Python

System Administrator · Cebi International

Mar — Sep 2025

Set up a Linux server, installed and configured GLPI for ticket management, and rolled out system improvements.

Linux · PHP · JavaScript · MariaDB

Web Developer (intern) · Institut St-Aspais

Jan — Feb 2020

Built a ticketing application with another intern, then maintained it after the internship.

PHP · HTML · SQL

PROJECT

MonPoste (monposte.com): job board for students and young graduates. About 100,000 collected offers, guard-railed AI CV tailoring (Gemini, schema-validated outputs), SEO, Stripe, Docker Compose and Caddy. Designed, built and run solo.

EDUCATION

Master's-level engineering degree (Diplôme d'ingénieur), EPITA, Paris · Major in Consulting, specialisation in Blockchain

2021 — 2025

BTS SIO, software development track, Institut St-Aspais · Two-year higher national diploma in IT 2019 — 2021

SKILLS

Front end: TypeScript, React, Next.js, TanStack Query, Tailwind CSS, Vite, Astro

Back end & data: Node.js, Express, PostgreSQL, Prisma, MariaDB, Python, PHP

Infrastructure: Linux, Docker, Docker Compose, Caddy, Git, CI/CD

AI & services: Gemini API, Stripe, Brevo, Playwright, Umami

LANGUAGES

French: native

English: professional
